

Hygiene perfected: effective immediately, one disinfectant with five advantages is sufficient: DISIFIN®-tech.

You want to dose so simply and disinfect so efficiently?

DISIFIN®-tech is

Especially in these application ranges DISIFIN® proves its superiority when disinfecting surfaces. Try it!

1

SAFELY TO DOSE AND AT THE SAME TIME SIMPLY IN ITS HANDLING

Because DISIFIN®-tech dissolves quickly in water and the optimum agent concentration is immediately available.

2

IDEAL, REGARDING THE STOCKKEEPING

Because the concentrated agent is available in space-saving tablets form.

3

ALL AROUND EFFECTIVE AGAINST YEASTS, VIRUSES, FUNGI AND BACTERIAS

Numerous expert's opinions are verifying the complete spectrum of impact.

4

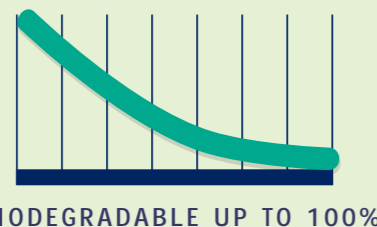

RELIABLE PREVENTIVE AGAINST RESISTANCE FORMATION

Because DISIFIN®-tech completely oxidizes all microorganism, no resistance formation is possible.

5

BIOLOGICALLY LOGICAL, AS IT IS BIODEGRADABLE UP TO 100%

DISIFIN®-tech completely biodegrades in the nature within a few days. The formation of AOX-compounds is evidently neglectably small.

AND ITS SO EASY AND SAFE
Dissolve DISIFIN-tech-tablets in water and simply rinse, spray or atomize.

JUST GIVE US A CALL

If you would like to know more concerning the new disinfection agent, don't hesitate to call our hotline. Extensive technical expert's opinions, examinations as well as your personal test-pack are already ready for you.

DISIFIN[®]
A SAFETY CLASS OF ITS OWN

Brand-new! The solution for all surfaces:
Simply dose. Disinfect efficiently.

DISIFIN[®]
A SAFETY CLASS OF ITS OWN

Drastic against viruses, bacteria, yeasts and fungi. And thus optimal.

Mild to the surfaces, but not to the germs.

A regular disinfection of the units, floors and surfaces in fitness-centers is indispensable, in order to extract pathogenic germs the basis of emergence. DISIFIN®-tech destroys quick and reliable micro-organism, is completely odorless and at the same time biodegradable up to 100%. All materials such as plastics, metals and woods are completely handled with care by DISIFIN®-tech.

DISIFIN®-tech is a new disinfection agent in tablet form. Wherever there is a great public run and there emerges at the same time a more or less damp environment, bacteria, fungi and viruses and also other microorganism accelerates their growth and can thus lead to serious infections at the mankind. DISIFIN®-tech provides for absolute hygienical cleanliness and this is the condition for the activity of strongly frequented devices. The most efficient prevention is DISIFIN®-tech.

There is an ideal culture medium for microbial growth in the sanitary range. Here DISIFIN®-tech proves itself as an especially efficient disinfection agent, which destroys not only bacteria, fungi, viruses and other micro-organism but also removes smells. DISIFIN®-tech simplifies decisively the disinfection when rinsing with clear water, as it rinse off clearly and leaves no residues.

Rinse off clearly, leaves no residues.

The surrounding in solariums are often polluted with sweat and cosmetical residues. DISIFIN®-tech reliably disinfects in this range and destroys all microorganism. Herewith it cares for odorless and hygienical cleanliness. DISIFIN®-tech also do not wear off its cleaning and disinfecting impact even at higher temperatures.

Efficient mainly against persistent viruses.

The multi-talent, which is gentle to its surrounding.

One of the outstanding characteristics of DISIFIN®-tech is the longstanding stability in watery systems. Even days after the full efficiency is always existing. DISIFIN®-tech causes no damages at wood, plastics and metals at all. The application range of the temperature from 4°C up to 70°C prevents e.g. microbial growth also over the week-end.

No smell. No taste. No residues.

Whereas various and miscellaneous foods and drinks are prepared, a special and also simply to handle disinfection agent is requested. An agent, which reliably prevents not only microbial pollutions but is also mild to all surfaces. Just DISIFIN®-tech. It corrodes only what it should – and this are the microorganism.
